

Press Pad ULTRA

Material

Polymer layers with high temperature fabric, covered with metal foil

Layers:

- 1) Aluminium foil
- 2) Glass fibre
- 3) Silicone rubber
- 4) Glass fibre
- 5) Silicone rubber
- 6) Glass fibre
- 7) Aluminium foil

Available thickness

- Approx. 3.5 mm

Operating temperature

260°C (depending on application)

Properties

Weight:	4830 g/m ² ± 10%
Rebound/ Elasticity cushioning:	Up to 98%
Top Layer	No sticking

Usable for

PCB, PVC, PC, ABS, PET, PET-G

Special Information:

We recommend to run one test cycle before the standard lamination starts.
